5 port solenoid valve with spring return spool
SY-X350 Series

5 port solenoid valve with spring return spool

SY-X350 Series

► We focus on machinery safety as a key part of our product development strategy. This version will help satisfy your machine safety system requirements.

Main features

► Spring return spool - the concept

The SY-X350 versions contain a mechanical spring return spool. In the case of a system and pilot pressure loss, the spool moves to its de-energised position irrespective of the applied electrical control signal. When used as a safety related part of a control system, it thereby satisfies the de-energisation principle.

► Validated according to ISO 13849-2

This product is capable of meeting the relevant basic and well-tried safety principles.

Please download our reliability data for the details.

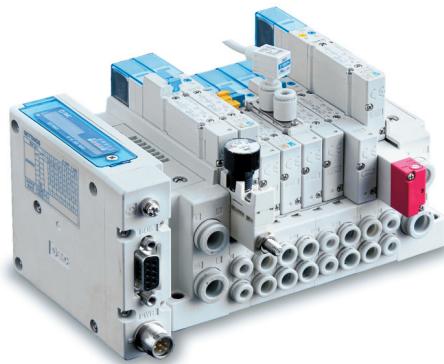

► SISTEMA library is available

SY safety-related valves data are additionally integrated into the SISTEMA software tool.

Download the library file from our website and be ready to build your safety function.

► SY series valves

Benefit from the high versatility this series gives you and create your own configuration, tailored to your needs.

Applications

Because it has a spring to return the spool, it can be used to implement safety related control systems where the valve spool must always return to the de-energised position on loss of system and pilot pressure, irrespective of the applied electrical control signal.

How to order

Base mounted SY 0 - 1 - - X350

Top ported SY 3 - 1 - - - X350
 (1) (2) (3) (4) (5) (6) (7) (8) (9) (10) (11) (12) (13)

① Valve series

3	3000
5	5000
7	7000

② Type of actuation

1	2-position single
A	4-position dual 3-port N.C./N.C.
B	4-position dual 3-port N.O./N.O.
C	4-position dual 3-port N.C./N.O.

1) A, B, C option is not available for metal seal type.

③ Seal type

0	Rubber seal
1	Metal seal (only for SY3000)

④ Pilot type

—	Internal pilot
R ¹⁾	External pilot

1) SY3000 and SY7000 4-position dual 3-port valves are not available with external pilot option.

⑤ Back pressure check valve

—	None
H ¹⁾	Built-in

1) SY3000 and SY7000 4-position dual 3-port valves are not available with this option.

⑥ Pilot valve option

—	Standard (0.7 MPa)
B	Quick response type (0.7 MPa)
K ¹⁾	High pressure type (1.0 MPa)

1) Only SY3000 metal seal type is available for the high pressure type.

⑦ Coil type

—	Standard
T	With power saving circuit (continuous duty type)

- 1) Be sure to select the power saving circuit type when the valve is continuously energized for long periods of time.
- 2) Be careful of the energizing time, as quick response and high pressure types will become operational when the energizing time is over 40 ms.

⑧ Rated voltage

5	24 VDC
6	12 VDC

⑨ Light/surge voltage suppressor and common specification

—	W/o indicator light & surge suppressor (non-polar)
R	W/surge suppressor (non-polar)
U	W/indicator light & surge suppressor (non-polar)
S	W/surge suppressor (positive common)
Z	W/indicator light & surge suppressor (positive common)
NS	W/surge suppressor (negative common)
NZ	W/indicator light & surge suppressor (negative common)

1) Only "Z" and "NZ" type is available for the product with power saving circuit.

⑫ Thread type

—	Rc
F	G
N	NPT
T	NPTF

1) Only "—" is available for M5.

⑬ Type of mounting screw

—	Round head combination screw
B	Hexagon socket head cap screw
K	Round head combination screw (falling-out -prevention type)
H	Hexagon socket head cap screw (falling-out -prevention type)

Note 1) The SY with external pilot type has a maximum operating pressure of 0.5 MPa and the pilot pressure shall be 0.2 MPa higher than the operating pressure. If a 0.7 MPa operating pressure is needed, please order SY5000-X67 or SY7000-X323 versions.

Note 2) Individually wired with M8 connector. Independent of parallel wiring or serial communication also available using the SY5000-X49 version.

Note 3) Refer to the respective "Reliability data" for the latest "How to order".

Valve specifications

Valve type			Rubber seal	Metal seal			
Fluid		Air					
Internal pilot operating pressure range [MPa]		0.15 to 0.7		0.1 to 0.7 (High pressure type: 0.1 to 1) —			
External pilot operating pressure range [MPa]		-100 kPa to 0.7 (4-position: -100 kPa to 0.6)		-100 kPa to 0.7 (High pressure type: -100 kPa to 1)			
Pilot pressure range		0.25 to 0.7		0.1 to 0.7 (High pressure type: 0.1 to 1) —			
Ambient and fluid temperature [°C]		Operating pressure + 0.1 or more (Min. 0.25) to 0.7					
Max. operating frequency [Hz]		-10 to 50 (No freezing)					
SY3000		5		20 ¹⁾			
SY5000		5		10 ¹⁾			
SY7000		3		—			
Min. operating frequency							
Manual override							
Pilot exhaust type	Internal pilot	Main/Pilot valve common exhaust		Main/Pilot valve individual exhaust			
	External pilot	Pilot valve individual exhaust					
Lubrication							
Mounting orientation²⁾							
Impact/Vibration resistance¹⁾ [m/s²]							
Enclosure							
Coil rated voltage [VDC]							
Allowable voltage fluctuation [V]							
Power consumption [W]	Standard	±10 % of rated voltage ⁴⁾					
	Quick response type	0.35 (With indicator light: 0.4)					
	With power saving circuit	0.9 (With indicator light: 0.95)					
Surge voltage suppressor							
Indicator light							

1) Use below 5 Hz for with the power saving circuit.

2) Impact resistance: No malfunction occurred when it is tested in the axial direction and at the right angles to the main valve and armature in both energised and de-energised states every time in each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 2000 Hz. Test was performed at both energised and de-energised states in the axial direction and at right angles to the main valve and armature. (Values at the initial period)

3) In the case of a metal seal, there are restrictions in the operating environment.

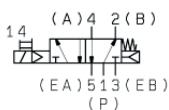

4) Due to voltage drops by the internal circuit in S/Z type and T type (with power saving circuit), use within the allowable voltage fluctuation as follows.

$$\begin{aligned} \text{S/Z type } & \left\{ \begin{array}{l} 24 \text{ VDC: } -7 \% \text{ to } +10 \% \\ 12 \text{ VDC: } -4 \% \text{ to } +10 \% \end{array} \right. & \text{T type } & \left\{ \begin{array}{l} 24 \text{ VDC: } -8 \% \text{ to } +10 \% \\ 12 \text{ VDC: } -6 \% \text{ to } +10 \% \end{array} \right. \end{aligned}$$

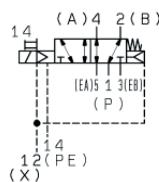

5) For technical data which are not shown in this document, please see the instruction manual or the standard catalogue at www.smc.eu.

1) The value is for manifold base with 5 stations and individually operated 2-position type.

2) These values are applicable to rubber seal type valves.

3) These values have been calculated according to ISO 6358 and indicate the flow rate under standard conditions with an inlet pressure of 0.6 MPa (relative pressure) and a pressure drop of 0.1 MPa.

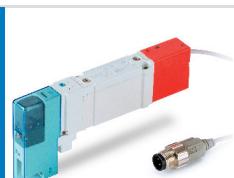

Note

For confirmation of detailed specifications and dimensions, refer to product drawings, instruction manual, reliability data and catalogue at www.smc.eu.
